Tudor Ciobanu	267632	ICT	10

Project title: CDNT Airlines Management System

Background: CDNT Airlines is an international airline that provides direct flights around the world. It has an account system through which customers can buy tickets at discounts between holidays. It also provides a recommendation system that is based on the preferences. The system would have a feature for heavy travelers that just need a cheap flight to travel around the world. Another feature would be that the client will pay to choose his/her seat and if he/she does not consider this relevant we can provide a random seat.

Keywords: Flights

Discount

Accounts

Cheap Flights

Chosen Seat

Individual learning objectives: Please state individual Learning objectives based on interest and feedback from previous projects and Process Report reflections.

Name	Learning objectives
Claudiu Rediu	Improving leadership skills Learn to use and interact with databases
Dominika Kubicz	Developing team work skills and experiencing working on projects
Tudor Ciobanu	Understanding the SCRUM framework Learning unit and use-case testing Learn design patterns
Nikita Roskovs	Increase team work skills, expand knowledge in database area and practice client/service system developing
